

Admin view

- index: main admin page with link pointing to edit_book page, upload_book, study_manager, and book_manager . additionally, two buttons for downloading user data and action data
- edit book: we already have, but it's a placeholder; need a whole new design (for adding/editing/deleting questions in a book)
- upload book: we already have; has to be a separate page; has a form that needs the title, description, and school
- study manager: for moving users and assigning them to studies; additionally, there will be a <https://getbootstrap.com/docs/4.0/components/modal/> that allows the administrator to create studies (with study_names and study_invite_codes)
- book manager: show all of the books
